

# CARPE Symposium

## Porto, 2025

### Special Interest Group: Health

**May 15th at 14.30**

**Aim and focus of the session:**

**The aim of the session is to plan concrete actions to share expertise, knowledge and skills within CARPE partners on current topics regarding health.** The SIG Health is challenging two big topics. One is the relaunch of the group in spring 2024 which means that many of the participants didn't know each other (in person) and the group is not transparent yet regarding their research topics and expertise. On the other hand, health is a broad field, so that research topics and expertise are widely spread.

The participants, in this session, will be encouraged to share ideas on concrete actions (means) to share expertise across CARPE partners (professionals and students) and to plan an online seminar series that addresses key topics within Health across Europe (and beyond). In the session there will also be discussion on developing publications based on existing research and expertise within the SIG.

**May 15th at 16.30**

**Aim and focus of the session:**

**The aim of the session is to plan concrete actions to effectively promote contacts within researchers** across CARPE partners in the topic of Health and beyond (also contacts within other SIGs). The participants, in this session, will be encouraged to share ideas on concrete actions to promote effective sharing of RDI ideas and promoting contacts within the CARPE partners (to make sure "right people find each other"). The current time challenge is that there are several researchers looking for "right" partners for further developing innovative (new) research ideas and prepare research proposals. There is also a challenge to find international collaborators/partners for disseminating RDI findings of projects. In this session concrete means to solve these challenges, will be discussed and developed within the focus of the SIG. Members of the SIG will be asked in advance to look for relevant calls that can be discussed within the meeting.

Abstract

## **CARPE Health SIG**

**Leader:** Camilla Laaksonen, TUAS, [Camilla.laaksonen@turkuamk.fi](mailto:Camilla.laaksonen@turkuamk.fi)

**Co-leader:** Taika Bernhard, HAW, [Taika.Bernhardt@haw-hamburg.de](mailto:Taika.Bernhardt@haw-hamburg.de)

May 15<sup>th</sup> at 11.30 (2 parallel sessions)

### **Aim and focus of the session:**

**The aim of the session is to continue discussion and work on the two Horizon calls.**

The Health SIG has started discussions and preliminary work on 2 potential Horizon calls. The discussion and preliminary work will continue in parallel sessions.
